

### Research Volunteers Needed at the M.I.N.D. Institute

Parents: We need your help! The UC Davis M.I.N.D. Institute's clinical research program is seeking children of all ages (birth to adulthood) to participate in our studies. The research team is seeking participants with neurodevelopmental disorders, developmental delays, or typical development. In addition to helping our understanding of neurodevelopmental disorders, participants benefit from state-of-the-art assessment techniques and feedback from clinical researchers. Some studies also offer financial compensation. For more information, please contact Meridith Brandt at (916) 703-0320 or go to [www.mindinstitute.org](http://www.mindinstitute.org).
